

NEW SL4 eLED MK2

The SL4 has been the gold standard for small utilitarian dive lights for decades. Owning a SL4 is owning a piece of scuba diving history. It is compact enough to slide comfortably into a BC pocket and has a bright center spot to light up dark spaces under any type of diving condition.

Now, UK is introducing the updated and enhanced Mark 2 version of the SL4. For the first time, we are using a digital controller to take maximum advantage of all four C-size batteries. The SL4 Mark 2 boasts an eye-watering 600 lumens of brightness, while retaining all the great qualities that made it the most popular dive light in history.

FEATURES

- Machined reflector yields a bright center spot, which gives the light the ability to penetrate the darkest ledges or murkiest water
- All polymer construction makes it impervious to seawater, the enemy of steel and aluminum alike
- Single handed switching with thumb or index finger
- LED will not break when dropped and lasts thousands of hours
- Equally great performance in and out of water for home or work
- Rubber sheath molded over bezel to reduce glare and improve impact resistance
- The SL4 has the added benefit of providing light when all other solutions have failed. Even after the batteries are mostly exhausted, the SL4 can still emit several lumens for up to a week of continuous use

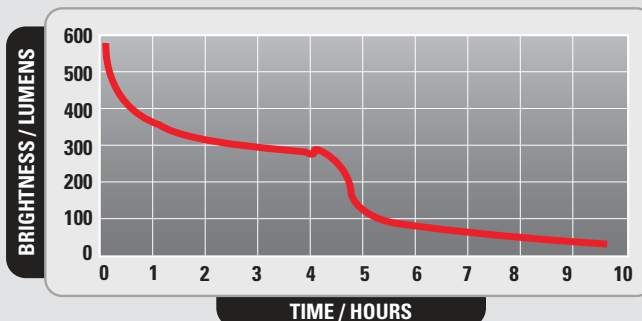

One-handed switch operation

SPECIFICATIONS

Brightness	600 lumens
Burn Time	6 hr
Distance	817 ft / 249 m
Lamp	High intensity white LED
Batteries	4 C Alkaline / LR14
Size	6.2 x 1.7 x 2.5 in / 157 x 43 x 63 mm
Weight	15.2 oz / 431 g (with batteries)
Waterproof	500 ft / 150 m
