## Aqualite Pro 2 1200 Lumens (max)

Narrow Lens	Narrow Diffused
Wide Lens	Wide Diffused

dim.	6.5 x 1.6 x 1.4
weight	8 oz
battery	(1) Rechargeable Lithium-Ion 21700
lamps	(3) High-Intensity LED
depth	300 ft

A perfect multi-purpose LED dive light for the traveling diver. Comes with two lenses, as well as a diffuser. Insert the narrow beam lens for combing the reef and looking under ledges. Pop in the wide angle lens for photography and video applications. For even wider fields of light, add the diffuser lens for use with super wide cameras such as the GoPro™. The rear extra large push button switch cycles the light through its 3 power levels. The Pro 2's extra-large removable Lithium-Ion battery provides additional burn time, which can be swapped with a spare for all day diving without recharge. Compatible with pistol grip and Aqualite photo arms.

### 3 Power Levels

**20° Narrow**  
Ideal For  
All-Purpose  
Diving

**70° Wide**  
Great for Video  
& Wide Angle  
Photography

**Choose Your Beam**  
Change the beam angle  
from Wide to Narrow by  
switching out the lenses.

## Aqualite Pro Multi 700 Lumens (max)

Narrow Lens	Narrow Diffused
-------------	-----------------

dim.	6.5 x 1.6 x 1.4
weight	8 oz
battery	(1) Rechargeable Lithium-Ion 21700
lamps	(3) 1 White LED / 1 Red LED / 1 UV395 LED
depth	300 ft

This multi-colored LED is the perfect choice for seeing marine life at its absolute best. Two levels of white light illuminate reef creatures under ledges or at night in full color. The red LED is ideal for both spotting creatures who flee from white light as well as not attracting those who are drawn to it. The UV395 beam causes some animals to flash colors that can't be experienced under any other light condition. Insert the wide-angle diffuser for video and still photography. In case of emergency, punch the rear selector button to access flasher mode. The Pro Multi's interchangeable Lithium-Ion battery can be swapped with a spare for all-day diving. Compatible with pistol grip and Aqualite photo arms.

### 2 Power Levels plus Signal Flash Mode

**Removable Rechargeable Li-ION Battery(s) with USB 2 type-A Smart Charger**

Many rechargeable dive lights have permanent batteries, causing the dive to stop for a recharge. The Aqualite series has a unique removable battery system that allows the battery to be swapped out for a freshly charged spare.

## Aqualite Pro Max 3000 Lumens (max)

Narrow Lens	Narrow Diffused
-------------	-----------------

dim.	8.7 x 1.6 x 1.4
weight	15 oz
battery	(2) Rechargeable Lithium-Ion 21700
lamps	(1) Ultra High-Intensity LED
depth	300 ft

As a primary, this super bright light can't be beat with its narrow penetrating beam for night, wreck, and cave diving. Pushing the large rear switch button selects 3 levels of brightness as well as emergency flash mode. For photography, simply slip in the diffusion filter for smooth, wide-angle illumination. Comes with two extra-large rechargeable Lithium-Ion batteries which can be swapped out with an extra set for continuous all day diving. Compatible with pistol grip and Aqualite photo arms.

### 3 Power Levels plus Signal Flash Mode

The large power switch makes it easy to cycle through the light settings, even with heavy gloves.

Like all UK divelights, the Aqualite series is constructed with an incredibly robust PC/ABS thermal alloy that can be immersed for 20 years in salt water and remain completely intact. These lights will remain corrosion-free for a lifetime.
